The Honorable JB Pritzker
Governor

The Honorable Don Harmon
Senate President

The Honorable Emanuel Chris Welch
House Speaker

The Honorable John Curran
Senate Republican Leader

The Honorable Tony McCombie
House Republican Leader

RE: FY 2026-2030 Crossing Safety Improvement Program 5-Year Plan

Dear Governor Pritzker and Members of the Legislative Leadership:

Pursuant to Public Act 90-659, the Illinois Commerce Commission is pleased to announce the FY 2026-2030 Crossing Safety Improvement Program 5-Year Plan. The Plan outlines safety improvements at highway-rail grade crossings and bridges located on local roads and streets throughout the State of Illinois.

In addition to the Grade Crossing Protection Fund (GCPF), the Plan also includes funding from the 2019 Rebuild Illinois Capital Plan (RBI) that provided \$78,000,000 "*appropriated from the Multi-Modal Transportation Bond Fund to the Department of Transportation for the installation of grade crossing protection or grade separations at places where a public highway crosses a railroad at grade, as ordered by the Illinois Commerce Commission.*" Unlike the GCPF, these funds are not limited to local routes or other restrictions, and we are hopeful that this will help address longstanding safety concerns, allowing greater project contributions for the CSIP overall.

The Commission Plan seeks to authorize over \$400 million from GCPF and RBI funding for new grade crossing safety improvements and highway-rail grade separations over the course of this five-year horizon at nearly 969 crossing locations. With the availability of Local and Railroad funding matches, this includes:

- 31 new or reconstructed highway-rail grade separations;
- 8 new pedestrian-rail grade separations;
- 359 at-grade crossings with upgrades to warning devices, and
- 571 crossings with low-cost improvements

As always, the Commission's goal is to maximize the use of the Grade Crossing Protection Fund to achieve the greatest amount of public safety per dollar spent.

Should you have questions or need clarification about any of the information presented, please contact Sarah Ryan, Director of Governmental Affairs, at (217) 785-2449.

Sincerely,

A handwritten signature in black ink that reads "Douglas P. Scott". The signature is written in a cursive style with a large initial "D" and "S".

Douglas P. Scott
Chairman

INTRODUCTION

The Illinois Commerce Commission (ICC) has the statutory responsibility to improve safety at public highway-rail crossings in the State of Illinois. As of February 1, 2025, there were 7,499 public highway-rail grade crossings in Illinois, of which 739 are on state roads, and 6,760 are on local roads. There are 2,623 public highway-rail grade-separated crossings (bridges) in the state. Nationally, Illinois is second only to Texas in the total number of highway-rail crossings. Table A summarizes the distribution of highway-rail and pedestrian-rail crossings by type and position.

Table A
Summary of Rail Crossings in Illinois

Crossing Type	Crossing Position	Crossings
Public Roadway	At-Grade	7,499
	RR Over	1,692
	RR Under	931
Pedestrian Pathway	At-Grade	135
	RR Over	62
	RR Under	42
Pedestrian Station	At-Grade	148
	RR Over	17
	RR Under	1
Private Roadway	At-Grade	3,288
	RR Over	99
	RR Under	11
Total		13,925

The ICC orders safety improvements at public highway-rail crossings on the local road system, with the cost of such improvements paid by the state, the railroads, and local governments. On state roads, the Illinois Department of Transportation (IDOT) pays the majority of the costs through the State Road Fund. For local roads, the Grade Crossing Protection Fund (GCPF) was created to pay the majority of the costs of improvements. This document provides a summary of the Commission's 5-Year Improvement Plan along with a list of the projects proposed for FY 2026; the four "out-years" of FY 2027 through FY 2030 and projects ordered and active in the current 2025 Fiscal Year.

RAILROAD CROSSING SAFETY – THE THREE E'S

Illinois is one of the key transportation hubs in the nation. With approximately 7,300 miles of railroad track, its rail system is the country's second largest, including the nation's largest rail freight hub in Chicago. Illinois has the nation's third largest highway system, with 147,105 miles of highways, streets and roads and 26,900 bridges as of December 2023. Figure 1 provides a map highlighting the extensive railroad network of Illinois. The network is operated by 101 railroads or industries providing rail service to ports and industrial facilities (59 Registered Rail Carriers).

Illinois Railroads 2025

- BNSF Railway
- CN Railway (CCP, GTW, IC, WC)
- CPKC (DME, GWWE, KCS, Soo)
- CSXT (BOCT)
- NS
- UP (ALS)
- Local Railroad
- Passenger Railroad (Amtk, Metra)
- Regional Railroad (DREI, IAIS, INRD, WSOR)
- Terminal Railroad (BRC, IHB, TRRA, TZPR)

Illinois Commerce Commission
1/30/2024

Data Source: ICC, National Transportation Atlas Database

Both the rail and highway systems are among the most heavily used in the nation in terms of volume of traffic, with much of the traffic concentrated in the Chicago metropolitan region. There, the urban mass transit system provided over 330.2 million passenger trips in 2023 (*pre-pandemic 2019 was 549.7 million passenger trips*) over an extensive network of bus and rail routes.

Keeping the grade crossing portion of this transportation network operating safely and efficiently involves local, state and federal governments as well as the private sector. These safety efforts can be summarized as the Three E's - Education, Enforcement and Engineering.

Education: The ICC is actively involved in developing programs to educate the public about the danger at highway-rail grade crossings. One example of this public education program is the ICC's participation in Operation Lifesaver. The Operation Lifesaver program is a public-private partnership designed to increase public awareness of grade crossing hazards. It also strives to improve driver and pedestrian behavior at railroad crossings by encouraging compliance with traffic laws relating to crossing signs and signals. More information about the ICC's education program can be found at: <https://www.icc.illinois.gov/rail-safety/illinois-operation-lifesaver>

Enforcement: Enforcement of existing traffic and trespass laws is key. For instance, persons crossing railroad tracks after the warning signals have activated may be fined up to \$500 for the first offense and \$1,000 for a second offense, or ordered to complete community service. The most recent edition of the **Illinois Highway-Rail Grade Crossing Safety and Enforcement Manual** can be found at: <https://www.icc.illinois.gov/rail-safety>

Engineering: Grade crossing safety improvements are also critical to reducing collisions. The ICC orders physical and system improvements, including the installation and upgrading of grade crossing warning signs and signals and, where warranted, grade separations. While education and enforcement are absolutely essential, the focus of this report is the engineering of capital improvements to further railroad crossing safety on local roads. Please refer to the **Illinois Grade Crossing Protection Fund Resource Guide** for more specific information on engineering options. <https://www.icc.illinois.gov/downloads/public/rr/GCPF%20Resource%20Guide.pdf>

2024 IN REVIEW – Collisions and Casualties

In 2024, preliminary statistics indicate there were 80 collisions at public highway-rail crossings in Illinois, compared to 89 in 2023, a 10.1 percent decrease. National preliminary figures for 2024 indicate 1,866 collisions occurred at public highway-rail crossings compared to 1,885 in 2023, a decrease of 1.0 percent.

Figure 2. 10-Year Trend in Collisions at Public Crossings: USA

Figure 3. 10-Year Trend in Collisions at Public Crossings: Illinois

Data Source: Federal Railroad Administration. 2024 is an ICC estimate for the full-year of 2024 as FRA data was only available through October when this report was prepared.

The general public commonly thinks of grade crossing collisions as involving trains colliding with cars, and in most incidents that is the case; however, each year a substantial number of collisions involve motor vehicles driving into the sides of trains. In 2024, 20.0% of all collisions involved cars driving into the sides of trains, a percentage which has remained constant over the years. The 16 vehicle-into-train collisions in 2024 resulted in eight injuries and four fatalities.

Total fatalities resulting from collisions at highway-rail crossings in Illinois were 18 in 2023 and 18 in 2024. Fatality statistics, however, are not a particularly good measure of safety. Fatalities are a function of random events, such as how many occupants were riding in a car involved in a collision, or multiple fatalities involved in the same incident (as in the death of eleven passengers involved in the Amtrak/steel truck collision that occurred near Bourbonnais, in 1999). Table B illustrates the distribution of fatalities by collision type in 2024.

Table B – Illinois Highway-Rail Grade Crossing Collisions in 2024.

Type of Collision	Total Collisions	Fatal Collisions	Total Fatalities
Train Struck Vehicle	45	2	3
Vehicle Struck Train	16	2	4
Pedestrian	19	11	11
Total	80	15	18

There were two multiple fatality collisions in 2024: 4/25/2024 near Stonington when 2 people were killed in a train-motor van collision; and 11/20/2024 at Harvey when 3 people were killed after striking a train on the crossing.

RAILROAD CROSSING SAFETY FUNDING

The Grade Crossing Protection Fund (GCPF), appropriated to the Illinois Department of Transportation but administered by the ICC, was created by state law to assist local jurisdictions (counties, townships and municipalities) in paying for safety improvements at highway-rail crossings on local roads and streets only. Assistance from the GCPF cannot be used for safety improvements at highway-rail crossings located on the state road or highway system. Those improvements are paid for by the Illinois Department of Transportation. Beginning with Fiscal Year 2010, each month \$3.5 million in state motor fuel tax receipts is transferred from the Motor Fuel Tax (MFT) fund to the Grade Crossing Protection Fund. This amount provides the GCPF with \$42 million annually to be used for safety improvements at highway-rail crossings on local roads and streets. The GCPF is typically used to help pay for the following types of projects:

- Warning Device Upgrades: Installation of automatic flashing light signals and gates at public grade crossings currently not equipped with automatic warning devices; installation of automatic flashing light signals and gates at public grade crossings currently equipped only with automatic flashing light signals; signal circuitry improvements at public grade crossings currently equipped only with automatic warning devices;

- Grade Separations - New and Reconstructed: Construction, reconstruction, or repair of bridges carrying a local road or street over railroad tracks (overpass); construction, reconstruction, or repair of bridges carrying railroad tracks over a local road or street (subway);
- Grade Separations - Vertical Clearance Improvements: Lowering the existing highway pavement surface under a railroad bridge to improve vertical clearance for motor vehicles;
- Pedestrian Grade Separations: Construction of a bridge to carry pedestrian/bicycle traffic over or under railroad tracks;
- Interconnects: Upgrading the circuitry, warning devices and traffic signals at grade crossings where warning signals are connected to the adjacent traffic signals so that the two systems operate in a synchronized manner;
- Highway Approaches: Improvements to the portion of the public roadway directly adjacent to the crossing surface;
- Connecting Roads: Construction of a roadway between a closed crossing and an adjacent open, improved crossing;
- Remote Monitoring Devices: Sensor devices in the circuitry of grade crossing warning devices which immediately alert the railroad to any failures in warning device operations;
- Crossing Closures: Provide an incentive payment to local agencies for the voluntarily closure of public highway-rail grade crossings; and
- Crossing Surface Renewals: Up to \$2 million in assistance annually can be allocated for crossing surface improvements.
- Vehicle Detection System Maintenance – four-quadrant gate installations.
- Trespass Mitigation (new in 2021)

The cost of railroad crossing safety improvements varies substantially depending on the nature of the work undertaken. A standard installation of gates with automatic flashing light signals on a two-lane road typically costs approximately \$300,000. Additional costs for road improvements could typically range from \$2,000 to \$100,000, depending on the road type and location. Grade separation structures are very costly.

The GCPF has made contributions to pavement lowering (vertical clearance improvements) projects costing between \$35,000 - \$4 million, and to new underpass structures costing more than \$50 million. Bridges over railroads can cost from \$600,000 for a rural structure to over \$40 million for a multi-lane multi-railroad urban structure. Typically, the ICC authorizes contributions from GCPF that pay up to 60% of the cost for grade separation projects and 85% to 95% for grade crossing improvements. Dependent upon funding availability, higher contributions have been authorized.

Figure 4 provides a summary of the amount of Grade Crossing Protection Fund utilized for the most common types of improvement.

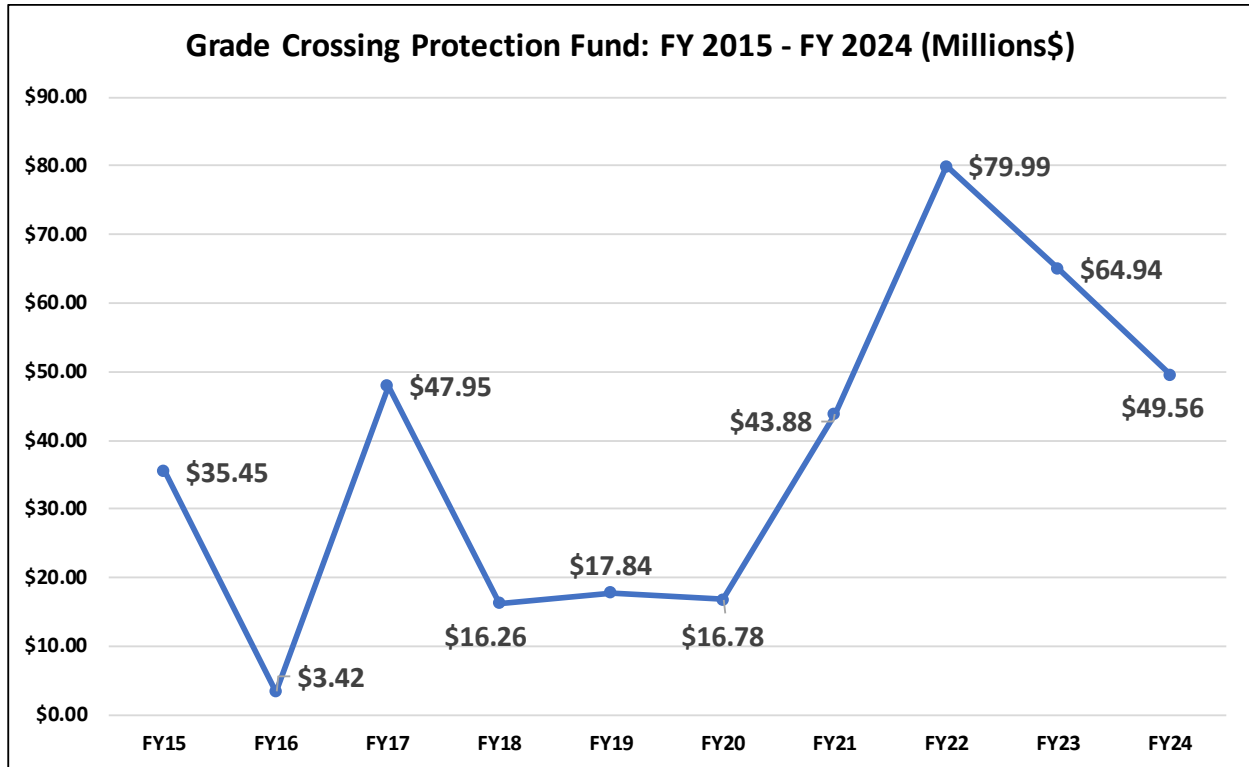

Figure 4. Summary of GCPF Projects FY 2015 through FY 2024.

Summary of the GCPF By Work Type: Fiscal Year 2015-2024	GCPF Total	% of GCPF	Crossing Count	% of Crossings	Avg. GCPF Per Crossing
Grade Separation-Construct	\$121,581,916	32.3%	22	0.8%	\$5,526,451
Gates with Automatic Flashing Lights-Install	\$93,426,325	24.8%	325	11.5%	\$287,466
Gates with Automatic Flashing Lights-Install & Roadway	\$51,096,419	13.6%	124	4.4%	\$412,068
Grade Separation-Reconstruct	\$48,849,564	13.0%	18	0.6%	\$2,713,865
Surface-Repair or Replace	\$15,996,633	4.3%	211	7.5%	\$75,813
Gates with Cantilever Flashing Lights-Install	\$8,717,670	2.3%	26	0.9%	\$335,295
Remote Monitors-Install	\$7,414,702	2.0%	1,307	46.3%	\$5,673
4 Quad Gates-Install	\$6,101,526	1.6%	14	0.5%	\$435,823
Close Crossing w/ GCPF Incentive	\$4,423,671	1.2%	43	1.5%	\$102,876
Roadway Approaches-Reconstruct	\$4,262,620	1.1%	37	1.3%	\$115,206
Pedestrian Grade Separation-Construct	\$3,745,161	1.0%	3	0.1%	\$1,248,387
LED Light Replacement	\$2,008,023	0.5%	611	21.7%	\$3,286
Warning Devices-Relocate	\$1,630,024	0.4%	4	0.1%	\$407,506
Automatic Flashing Lights/Cantilevered-Install	\$1,416,179	0.4%	5	0.2%	\$283,236
Gates with Cantilever Flashing Lights-Install & Roadway	\$1,074,666	0.3%	3	0.1%	\$358,222
Signal Predictors-Install	\$933,431	0.2%	3	0.1%	\$311,144
Warning Devices-Relocate; Roadway	\$821,536	0.2%	2	0.1%	\$410,768
Miscellaneous Projects	\$649,329	0.2%	12	0.4%	\$54,111
Interconnect-Install/Modify	\$644,243	0.2%	4	0.1%	\$161,061
Signal Shunt Test	\$639,729	0.2%	8	0.3%	\$79,966
Close Crossing/Construct Access Road	\$322,000	0.1%	2	0.1%	\$161,000
Pedestrian Gates-Install	\$276,499	0.1%	2	0.1%	\$138,249
4 Quad Gates-Vehicle Detection Maintenance	\$27,263	0.0%	11	0.4%	\$2,478
Roadway Delineators	\$17,122	0.0%	23	0.8%	\$744
Illinois Total FY15-FY24	\$376,076,251	100.0%	2,820	100.0%	

GCPF Over Time

Since the establishment of the GCPF in 1955, virtually every public highway-rail crossing in Illinois has received support from the Fund. Over two thousand passive signed crossings have received Yield signs and enhanced retro-reflective striping; over 3,000 crossings with train activated flashing light signals have received remote monitoring ability along with LED lights to replace incandescent lights; over 2,000 crossings have been upgraded from passive warning signs to train activated warning devices. Figure 5 provides a graphical summary of the amount of GCPF ordered by the Commission between Fiscal Year 2015 and Fiscal Year 2024.

Figure 5. Grade Crossing Protection Fund: FY 2015 through FY 2024.

Multi-Modal Transportation Bond Fund - Rebuild Illinois (RBI)

In 2019, the capital bill and Rebuild Illinois Capital Plan also included \$78,000,000 “appropriated from the Multi-Modal Transportation Bond Fund to the Department of Transportation for the installation of grade crossing protection or grade separations at places where a public highway crosses a railroad at grade, as ordered by the Illinois Commerce Commission.” These funds are not limited to local routes or other restrictions and will address longstanding safety concerns, allowing greater project contributions for the CSIP overall. Appendix 4 provides a summary of the RBI projects included in the FY 2026 to FY 2030 CSIP.

CROSSING SAFETY IMPROVEMENT PROJECTS

This report presents the railroad crossing safety capital improvements that ICC staff proposes to implement during FY 2026 and looks ahead to the projects contemplated for FY 2027-FY 2030. In all cases it is assumed that any required local funding match will be available. In some cases, local funding may not be available during the same fiscal year in which a crossing improvement has been programmed. In those circumstances the Rail Safety Section staff will recommend to the ICC that assistance from the GCPF for the project be reallocated to another fiscal year to accommodate the local agency.

The ICC receives numerous requests from local communities and railroads for assistance from the Grade Crossing Protection Fund for safety improvements at public highway-rail crossings. During development of each multi-year crossing safety improvement program plan, the large number of potential projects requires the ICC to prioritize projects based upon several criteria, including the relative safety of the existing crossing and the volume and types of existing train and highway traffic. After each potential project is prioritized based on engineering requirements, geographic location is also considered so safety improvements throughout the state can be addressed as equitably as possible. Projects not selected for the Plan are considered again as part of future 5-Year Plans.

The project list for Fiscal Year 2026 (July 1, 2025 through June 30, 2026) includes capital improvement projects that local governments or railroads have previously submitted to the ICC for evaluation and approval, as well as projects based on established priorities. The project list for FY 2027-2030 (out-year list) includes projects based on a continued effort to meet those established priorities:

- **High Collision History** - Each year the ICC places a high priority on upgrading public highway-rail grade crossings which have a pronounced history of train/vehicle collisions, or which have a high predictive value for future collisions. The FY 2026-2030 Plan will address safety improvements at as many of these crossing locations as possible.
- **Rail Corridors** - The ICC has identified as a priority the need to improve public highway-rail grade crossings in rail corridors where conventional speed passenger trains operate and along corridors to provide consistent safety improvements and maximize efficiency.
- **Highway Grade Separations (Bridges)** - The ICC is continually seeking locations where grade crossing blockages cause substantial motorist or emergency vehicle delay, or where heavy vehicular traffic represents a heightened threat of train/vehicle collisions. This Plan includes funding assistance for numerous highway/rail bridge projects on local roads and streets throughout the state.
- **Pedestrian Grade Separations (Bridges)** – The ICC also has authority to utilize the GCPF to assist local communities with the cost of constructing pedestrian grade separations in areas where it is necessary to improve safety. This Plan

includes funding assistance for several pedway/rail bridge projects throughout the state.

- **Interconnected Crossings** - The ICC and IDOT are continuing a program to identify and improve highway-rail grade crossings that require the interconnection of crossing warning signals with traffic control signals at adjacent highway intersections.

Please see the ICC’s Grade Crossing Search webpage for an interactive map of projects included in the FY 2026 – FY 2030, as well as past programs, and crossing inventory information. <https://www.icc.illinois.gov/rail-safety/grade-crossing-map>

FY 2026 PLAN

Projects programmed for submittal to the ICC in FY 2026 are listed in Appendix 1. In FY 2026 it is anticipated the ICC will consider projects requiring commitments from the GCPF totaling nearly \$110.1 million, including over \$28.3 million for bridge projects.

In FY 2026, the ICC will set aside \$10 million from the GCPF in contingency funds to address emerging projects which may require rapid resolution; experimental crossing safety projects; low-cost safety improvements at multiple crossings; and incentive payments to local agencies for the voluntary closure of public highway-rail grade crossings. It is anticipated that in the next four years the contingency funds will be used to help pay for low-cost improvements [replacement of incandescent flashing light signals with light emitting diode (LED) flashing light signals, for example]. These projects are summarized in Table C.

Table C – FY 2026 Projects by Project Type: Estimated GCPF Assistance.

Project Type	Crossings	GCPF \$ Millions
Pedestrian-Rail Bridge	2	\$5,000,000
Highway-Rail Bridge	9	\$23,333,185
Grade Crossing	158	\$63,213,290
Emerging, Low Cost, Closure or Surface	557	\$18,512,000
Total	726	\$110,058,475

NOTE: At the time the FY 2026 portion of the Plan was prepared, it was anticipated that assistance from the GCPF would be available for each project noted in Appendix 1. GCPF assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

FY 2027 – 2030 PLAN

Projects programmed for submittal to the ICC in FY 2027-2030 are listed in Appendix 2. For those four years, it is anticipated the ICC will consider projects requiring commitments from the GCPF totaling nearly \$254.7 million, affecting over 237 crossings in 43 counties. In addition, \$40 million from the GCPF will be set aside in contingency funds during FY 2027-2030. These projects are summarized in Table D.

Table D – FY 2027-2030 Projects by Project Type: Estimated GCPF Assistance.

Project Type	Crossings	GCPF \$ Millions
Pedestrian-Rail Bridge	6	\$18,020,000
Highway-Rail Bridge	17	\$108,081,724
Grade Crossing	200	\$79,803,712
Emerging, Low Cost, Closure or Surface	14	\$48,765,000
Total	237	\$254,670,436

NOTE: At the time the FY 2027-2030 portion of the Plan was prepared, it was anticipated that assistance from the GCPF would be available for each project noted in Appendix 2. GCPF assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

FY 2025 PROJECTS

Projects programmed for FY 2025 are listed in Appendix 3. It is currently estimated that the ICC will issue Orders authorizing nearly \$118.8 million in GCPF assistance for safety improvement projects affecting 151 crossings in 44 counties throughout the state by June 30, 2025. These projects are summarized in Table E below. Appendix 3 lists each individual project with specific location and cost information.

Table E – FY 2025 Projects by Project Type: GCPF Assistance Approved by the ICC.

Project Type	Crossings	GCPF \$ Millions
Pedestrian-Rail Bridge	2	\$2,913,484
Highway-Rail Bridge	17	\$64,673,089
Grade Crossing	113	\$48,478,967
Emerging, Low Cost, Closure or Surface	19	\$2,719,764
Total	151	\$118,785,304
