December 3, 2025

Dear Members of the General Assembly,

Public Act 100-0464 (SB1933) established Automatic Voter Registration (AVR), and mandates that the Illinois State Board of Elections submit an annual public report to the General Assembly and the Governor detailing the progress made towards implementing AVR. In addition to a progress update, this report shall provide certain statistics regarding AVR applications, as well as the number of those who submitted an application through the State Board of Elections' Online Voter Application (OVA) website (see 10ILCS 5/1A-16.7(o)). Enclosed herewith, please find an update on the progress to implement AVR at each designated AVR agency and the requested statistics for the period of November 28, 2024 through November 27, 2025. Also, statistics are provided for each agency for the period of July 1, 2018, the date of initial AVR implementation, through December 3, 2025.

If you have any questions regarding this report, please do not hesitate to contact me at dschultz@elections.il.gov or 217.782.1568.

Sincerely,

Dustin Schultz

Senior Voter Registration Specialist

Public Act 100-0464, otherwise known as Automatic Voter Registration (AVR) was signed into law by Governor Bruce Rauner on August 28, 2017. This report will overview the progress of the State Board of Elections' (SBE) efforts to implement AVR, as well as offer a status update for each agency required to participate in AVR.

The SBE has developed and offers three different platforms, batch, webservice, and website transfer, for agencies to submit voter registration application information to the SBE. Each agency is provided technical specifications for a batch, webservice, and website transfer connection so the agency is able to consider their current technological abilities and statutory requirements when determining which platform to connect with the SBE for registration application submission. Batch and webservice processing require the agency to collect all relevant registration information, while a website transfer allows registration information to be transferred and pre-populated to the SBE online voter registration website for completion by the applicant.

In addition, the SBE has had to modify the statewide registration database, otherwise known as the Illinois Voter Registration System (IVRS) to accommodate applications submitted directly to the SBE from agencies. Prior to AVR, agencies such the Office of the Secretary of State (SOS) would submit voter registration applications directly from Driver Services facilities to one of 108 election authorities by a paper process through the United States Postal Service. This application process was an inefficient and time-consuming method of registration that required each election authority to manually enter the voter registration application information into their local registration database. The implementation of AVR has created an electronic pathway whereby all registration applications originating from an agency are transmitted directly to the SBE, who then immediately distributes the registration application to the appropriate election authority electronically. In order for the SBE to serve as a conduit of application information to election authorities, the data distribution portion of IVRS also had to be modified. One small example is if an agency application does not have an electronic signature, the IVRS database is automatically searched for an existing registration that may be on file for the applicant from which the signature for the applicant can be obtained.

The numerous updates to IVRS required the SBE to update policies and procedures for election authorities to process electronic agency applications. The updated procedures for the registration of agency applications have been very well received by election authorities as each election authority no longer has to handle paper, and in many cases, no data entry is required on the part of the election authority due to connectivity between their local registration system and IVRS.

AVR also places additional requirements on the SBE. Some examples are to propose Administrative Rules, submit annual reports, and create website content about AVR. In 2024 pre-

registration of voters have also been incorporated into AVR. Sixteen-year-olds are eligible to register to vote and have their application held in abeyance by the SBE until they reach voting age. As of the date of this report, 106,432 individuals have submitted an application to pre-register to vote. 48,272 pre-registration applications have since reached voting age and have been registered to vote by the appropriate election authority.

This annual report will be the eighth annual AVR report submitted since AVR was enacted into law. Although progress implementing AVR at each required agency is ongoing in some cases, the SBE continues to work with each agency to meet statutory requirements regarding AVR. Ongoing maintenance and enhancements continue constantly to improve the deployment of AVR by the SBE. The remainder of this report will overview implementation of AVR at each required agency followed by the statistics required by 10ILCS 5/1A-16.7(o) of the Election Code for a period of November 28, 2024 through November 27, 2025.

Secretary of State (SOS)

The Office of the Secretary of State (SOS) has played a key role in voter registration for many years due to requirements under the federal National Voter Registration Act (NVRA), however the AVR statute established several new requirements for SOS. Most significantly is the directive to inform the applicant for services of their current voter registration status and the requirement to submit voter registration applications electronically to the SBE. As a result, voter registration has been completely incorporated into the Driver's Services process for the applicant. The SBE and SOS went to production with an electronic opt-in (whereby voters attest to eligibility) voter registration application process by the due date of July 2018. Opt-out registration (whereby applicants are automatically registered to vote unless they opt out) went into production in July 2019.

Over the past eight years, the SBE and SOS have worked cooperatively to resolve any technical hurdles that have presented. In 2021, SOS has begun submitting applications to the SBE with an indication for those who have a language preference other than English. Additional language options include Hindi, Mandarin, Spanish, and Urdu. In January 2022, SOS began submitting voter registration applications to the SBE that originated online through the SOS Safe Driver Renewal program and other online programs. Pre-registration for 16-year-olds went into effect on January 1, 2024 and has continued without issue.

As of this date, 4,500,090 voter registration applications have been electronically transmitted to the SBE from SOS since inception. In addition, a data sharing agreement has been executed and jointly adopted rules have been crafted but have not been implemented due to previous litigation. SOS has

reported that between November 28, 2024 through November 27, 2025, 1,064,941 people have opted out of voter registration while obtaining a REAL ID. Whereas 3,320,380 people have opted out of voter registration while obtaining a REAL ID since July 1, 2019.

Department of Human Services (DHS)

The Department of Human Services (DHS) is unique among the agencies required to connect for AVR because the statute specifically designated two divisions within DHS (Family and Community Services and Rehabilitation Services) as being required to connect. In 2019 a data sharing agreement was executed with DHS and DHS-Rehabilitation Services went to production with an AVR compliant web service connection utilizing opt-in registration. Whereas DHS- Family and Community Services implemented a website transfer mechanism (whereby voter registration information is prepopulated into our online voter registration website) for their applicants utilizing their online process. As of this date, 20,267 voter registration applications have been electronically transmitted to the SBE from DHS since inception.

Department of Natural Resources (DNR)

The SBE and the Department of Natural Resources (DNR) began discussing AVR soon after the initiation of AVR. DNR indicated the current agreement with their vendor for hunting and fishing license applications was near its end of life and as such they would not be able to initiate any required AVR changes within their current system. DNR were to meet the AVR requirements through their new Enterprise Licensing System. DNR, in a good faith effort to comply with the spirit of AVR, was able to put into production a website transfer mechanism (whereby voter registration information is prepopulated into our online voter registration application website) for DNR's duck, goose, dove, upland game, and pheasant hunting license systems.

The agreement for a statement of work on the new Enterprise system was eventually agreed upon in August 2019. The SBE worked with DNR, the Department of Innovation and Technology (DoIT), and DNR's Enterprise vendor to incorporate a fully AVR compliant web service with the Enterprise system. The DNR hunt/fish license application went into production with an AVR compliant web service in August 2021. The SBE and DNR have agreed on the principles for a data sharing agreement and DNR indicated a desire for DoIT to also be included as a party to the agreement. As of this date, 4,620 voter registration applications have been electronically transmitted to the SBE from DNR since inception.

Illinois Department of Financial and Professional Regulation (IDFPR)

The SBE and IDFPR have held several discussions regarding the implementation of AVR. IDFPR have a good understanding of the requirements of AVR but have in recent meetings indicated that they would be unable to prioritize implementing AVR with their new license application system recently procured. IDFPR has been provided with a unique website link to display on their website which re-directs individuals to the SBE's online voter registration website to allow IDFPR to receive credit for the origination of the voter registration application.

Illinois Department of Employment Security (IDES)

The SBE and IDES have also held several discussions regarding AVR implementation since AVR began. IDES and SBE have worked cooperatively to sign an interagency data sharing agreement, which was signed on October 1, 2024. Over the course of this year IDES and their technical team programmed and implemented a website transfer AVR solution, due to Federal privacy laws. As of this date, 2,131 voter registration applications have been electronically transmitted to the SBE from IDES since inception.

Statistics

The remainder of this annual report will provide certain statistics as required by 10ILCS 1A-16.7(o). Among the requirements are to provide the number of records transmitted to the SBE by agency, the number of new and updated voter registrations by agency, and the number of applications received through the online voter application (OVA) system. The number of people who opted out of registration is also required to be reported. Since this information is collected by each agency, the number is reported within the agency update. SOS is the only agency participating in opt-out registration at this time, so the number of individuals who opted out of registration is only reported for SOS. The decision to accept or reject a voter registration application is under the jurisdiction of Illinois' 108 election authorities.
